REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record do not fairly teach in permissible combination the claimed invention. Upon further consideration, it is noted that Calabro et al do not teach the changing shape of the gas channel grain but rather a series of alternatives of the cross section (see Fig. 4). Beuschel teaches the changing shape of the gas channel along the axis. However, the claims specifically require:

"A system for passively controlling pressure oscillations of hydrodynamic origin in a solid propellant thruster comprising a body containing a charge of solid propellant, the system comprising at least one insert disposed in said thruster body transversely relative to a combustion gas flow channel formed in the solid propellant charge, said insert including a single opening of non-axisymmetric shape that is different from the shape of the gas flow channel so as to generate a three-dimensional effect on the flow in order to prevent axisymmetric turbulent modes from forming in the thruster" and

"A method of controlling pressure oscillations of hydrodynamic origin in a solid propellant thruster, wherein a three-dimensional effect is generated on the flow to prevent axisymmetric turbulent modes forming, by placing an insert in the thruster transversely relative to a combustion gas flow channel formed in the thruster, said insert having a single opening of non-axisymmetric shape that is different from the shape of the gas flow channel." In Beuschel, because there is no single shape that can be ascribed to the gas flow channel because it is different depending on where the cross section is taken.

Consequently, even if combining the references they would not read on the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
